Portfolio: https://my-main-personal-protfolio.vercel.app | LeetCode: https://leetcode.com/u/gangadhar31

Experience

- **GetSetAI Innovations** Jun 2026 – Present
  Software Development & App Development Intern
  - Engineered and deployed full-stack web and mobile application modules using React, Node.js, and REST APIs, contributing to scalable software solutions while streamlining deployment workflows and improving development efficiency by 15%.
  - Collaborated across frontend, backend, and infrastructure teams to implement, debug, and optimize 10+ application features, accelerating project delivery by 20% and improving code maintainability.
- **Skill Craft Technology** Jan 2026 – Mar 2026
  Web Development Intern
  - Engineered responsive web applications and interactive UIs using HTML, CSS, and JavaScript, enhancing user engagement by 20% through improved navigation and functionality.
  - Built reusable UI components with HTML, CSS, and Bootstrap, accelerating frontend development by 30% and improving project efficiency.
  - Designed a responsive framework, improving website performance by 25% and ensuring seamless UX across all device types.
- **SRM University - AP** Jun 2025 – Aug 2025
  Research Intern
  - Optimized prompt engineering workflow using Python and LLMs, creating 5 bespoke LLM prompts that generated 500 synthetic case studies, boosting training data by 30% and accelerating model fine-tuning.
  - Integrated advanced NLP techniques and LLMs, reducing manual legal document analysis time by 20 hours weekly.
  - Engineered a dual-LLM legal assistant automating document analysis and intelligent query resolution, reducing manual review time by 60%.

Projects

- **PrivAccess: Zero-Knowledge RBAC Framework** GitHub Live Demo
  Tech Stack: Zero-Knowledge Proofs, Node.js, Cryptography, Access Control
  - Engineered a privacy-preserving Role-Based Access Control framework using Zero-Knowledge Proofs and Node.js, strengthening authentication and securing access verification across 100% of protected routes.
  - Identified and mitigated 5+ critical access-control vulnerabilities while improving authorization workflow reliability by 30%.
  - Improved auditability and system trust by decoupling identity verification from raw credential exposure, supporting traceable logs for 100+ access events.
- **Book Management System (Full Stack)** Backend Frontend Live Demo
  Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs
  - Developed a MERN application with authentication, CRUD operations, search, and pagination.
  - Built secure REST APIs with JWT authentication and protected routes.
  - Designed a responsive dashboard with reusable React components.
- **Nebula Canvas – Interactive Particle Engine** GitHub Live Demo
  Tech Stack: HTML5, CSS3, JavaScript (ES6+), Canvas API
  - Built a high-performance particle simulation engine with a glassmorphic control dashboard, rendering 1000+ particles in real-time physics simulation at a smooth 60fps.
  - Implemented magnetic interaction modes, custom particle shapes, and a Celebrations Engine with fireworks, confetti, and supernova animations, expanding interactive feature count by 40%.
  - Optimized rendering with a requestAnimationFrame loop and proximity-based connection mapping, reducing frame drops by 25% and ensuring smooth performance across desktop and mobile.
- **AI Rock Paper Scissors By Hand Gesture Recognition** GitHub Live Demo
  Tech Stack: HTML5, CSS3, JavaScript, MediaPipe Hands, WebRTC
  - Developed a real-time hand gesture recognition game using Computer Vision, OpenCV, and MediaPipe for accurate gesture classification and interactive gameplay.
  - Built an AI-powered gesture detection pipeline with real-time video processing, enabling low-latency predictions and an enhanced user experience.
  - Optimized image preprocessing and hand landmark detection to improve recognition accuracy and application responsiveness.

- **Credit Card Fraud Detection System** GitHub Live Demo
  Tech Stack: Python, Pandas, NumPy, Scikit-Learn
  - Developed a machine learning fraud detection system achieving 95% prediction accuracy through feature engineering, preprocessing, and ensemble classification techniques.
  - Built an end-to-end prediction pipeline using Python, Pandas, NumPy, and Scikit-Learn for efficient fraud analysis and real-time risk classification.
  - Applied ensemble classification techniques to balance precision and recall on highly imbalanced transaction data.

Technical Skills

- **Languages:** C, C++, Python, JavaScript
- **Web:** HTML, CSS, Bootstrap
- **Auth & APIs:** JWT, REST APIs

Frameworks: React, Node.js, Express
Database: MySQL, MongoDB
Core: DSA, DBMS

Certifications

- Oracle Certified Java SE 17 Developer
- Red Hat Certified in Containers
- SAP Certified – SAP Generative AI Developer

Education

SRM Institute of Science and Technology, AP 2023 - 2027
B.Tech in Computer Science and Engineering CGPA: 8.48/10

Narayana Junior College, Tenali 2021 - 2023
Class XII 94.9%

Narayana English Medium School, Tenali 2020 - 2021
Class X 100%
